

Introducing Slate Stain for Maple Doors

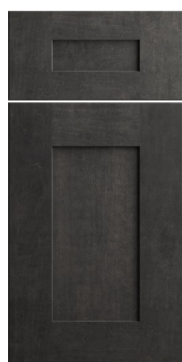

Smart, stylish solutions for **builders, designers, remodelers** and **homeowners**

Nothing says welcome home quite like the rich, warm hue of Slate Stain on Maple doors. With grayish brown undertones, this expertly finished stain mixes well with stainless steel accents and is versatile enough for a casual or upscale setting.

Fitting in nicely with our palette of stains and paints, this beautiful shade is meticulously

applied to enhance the natural characteristics and grain of the wood and finished off with a durable, protective topcoat for a silky and consistent wood grain finish.

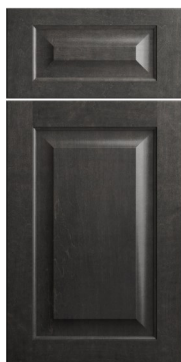

Featured above in Monterey and available in 6 different door styles, this trend-forward stain pairs well with other neutrals to create a comfortable and inviting space. From farmhouse chic and rustic industrial, to cozy and classic, Slate Stain on our Maple doors will create a unique space reflective of the people who live there and call it home.
