PRODUCT CHANGE NOTIFICATION – Face Frame and Doors

We are improving our Face Frame and Door sets with a new construction that provides increased durability, reduces shipping damage and simplifies installation. Effective December 1, 2018, Door and Frame sets will transition from assembled to ready-to-assemble (RTA) as shown below. Arriving flat packed, Stiles will be bored and Rails will come with dowels pre-inserted for assembly in the field. All other specifications remain the same with the overall frame dimension allowing for a 3” reduction in both width and height. For product nomenclature and details, reference pages 38 and 39 of the Specification Guide.

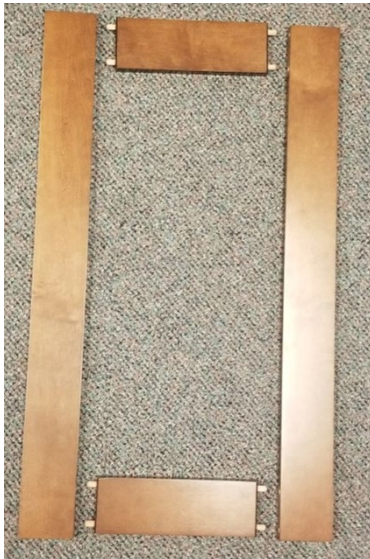

EFFECTIVITY DATE

Orders produced on or after December 1, 2018

SPECIFICATIONS
